DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group 1, claim(s) 1-3, drawn to a microarray chip.

Group 2, claim(s) 4-7, drawn to a method for indexing a microarray chip.

The inventions listed as Groups 1 and 2 do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The claimed microarray chip comprising a plurality of spots arranged in a predetermined positional relationship wherein some of the spots provide index information for specifying the microarray chip was known in the art at the time the claimed invention was made as taught by Winkler et al (U.S. Patent No. 5,677,195, Column 18, line 51-Column 19, line 24) and also by Sadler et al (U.S. Patent No. 5,763,870, Column 6, lines 31-46). Therefore the special technical feature of Group 1 does not constitute a special technical feature as defined by PCT Rule 13.2.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
